Feature Article: The Journey from Apprentice to B.C.'s Labour Market: Employment Outcomes of Former Apprenticeship Students

The Journey from Apprentice to B.C.'s Labour Market: Employment Outcomes of Former Apprenticeship Students

Introduction

The BC Apprenticeship Student Outcomes (APPSO) Survey is an annual province-wide survey of former apprenticeship students who have completed their final year of apprenticeship training in a participating B.C. post-secondary institution.[1] The 2009 APPSO Survey, conducted in February and March of 2009, interviewed 2,099 former students from 23 different apprenticeship program areas.

This article, which is based on data from the 2009 APPSO Survey, looks at key employment outcomes for former apprenticeship students, including labour force participation, employment, and unemployment rates, wage rates, and the relevance of apprenticeship training to labour market demand.

There are currently more than 100 apprentice trade programs in B.C. leading to a government-recognized credential and employment as a certified tradesperson. For reporting purposes, these trades programs are grouped into program areas according to Classification of Instructional Programs (CIP) coding.[2]

The survey included students from a number of different program areas. As shown in the following table, the most common program areas among respondents were Electrician (18% of respondents), Carpentry (12%), and Plumbing (11%).

Survey respondents represented a wide range of apprenticeship program areas

Apprenticeship Program Area	% of Total Respondents
Electrician	18%
Carpentry	12%
Plumbing	11%
Exterior & Interior Finishing Trades	7%
Automotive Mechanics	7%
Steel Fabrication & Welding	6%
Pipefitter & Sprinkler Fitter	5%
Heavy Duty Mechanics	5%
Machinist	4%
Industrial Mechanics & Maintenance	4%
Autobody/Collision & Repair	4%
Culinary Arts	4%
Heating, Air Conditioning, Refrigeration	3%
Precision Metal Working	2%
Medium/Heavy Vehicle & Truck Mechanics	2%
Construction Heavy Equipment	2%
Other Programs	5%
Total	100%

How many former apprenticeship students are participating in the labour market?

At the time of the survey, virtually all respondents (97%) were in the labour force—that is, employed or looking for work. This participation rate is extremely high—among demographic groups in B.C. the highest participation rate in 2009 was among men aged 30 to 34 (91.4%), still more than 5 percentage points below that of former apprenticeship students.

[1] For more information about the former students surveyed, refer to the section *About the Survey* on page 4.

[2] The current classification used at Statistics Canada to classify instructional programs according to field of study.

What is the unemployment rate among former apprenticeship students?

When looking at the unemployment rate of former apprenticeship students, it is important to consider recent changes in B.C.'s labour market. In the latter half of 2008, British Columbia entered an economic slowdown, and labour market conditions began tightening. Between March 2008 and March 2009, there were 83,400 job losses in B.C.[3] Many of these losses (-34,000) were in the construction industry, where approximately half of all employed apprenticeship survey respondents have been working in recent years.

Despite these labour market challenges, the unemployment rate among former apprenticeship students was relatively low (7.8% at the time of the survey). For comparison, in March 2009, the unemployment rate (unadjusted) among B.C.'s population aged 20 to 59 was 7.2%.

At the time of the survey, unemployment rates varied considerably between apprenticeship program areas. Former apprenticeship students from Construction Heavy Equipment (28.1%) and Precision Metal Working (16.7%) programs had the highest unemployment rates, while those who completed Culinary Arts (2.8%), Medium/Heavy Vehicle & Truck Mechanics (2.4%), and Heating, Air Conditioning & Refrigeration (0%) programs boasted the lowest unemployment rates.

Unemployment rates of former apprentices varied across program areas

Apprenticeship Program Area	Unemployment Rate
Heating, Air Conditioning, Refrigeration	0.0%
Medium/Heavy Vehicle & Truck Mechanics	2.4%
Culinary Arts	2.8%
Other Programs	4.0%
Machinist	4.5%
Autobody/Collision & Repair	5.1%
Automotive Mechanics	5.1%
Pipefitter & Sprinkler Fitter	5.5%
Heavy Duty Mechanics	6.3%
Exterior & Interior Finishing Trades	8.0%
Industrial Mechanics & Maintenance	8.9%
Plumbing	9.3%
Steel Fabrication & Welding	9.3%
Electrician	9.6%
Carpentry	9.9%
Precision Metal Working	16.7%
Construction Heavy Equipment	28.1%

How many former apprenticeship students are employed?

A large majority (89%) of former apprenticeship students were employed at the time of the survey. The employment rate was high among most of the program areas, particularly in Heating, Air Conditioning, & Refrigeration (96%) and Autobody/Collision Repair programs (95%), although some programs had a considerably lower rate, such as Precision Metal Working (68%) and Construction Heavy Equipment (64%).

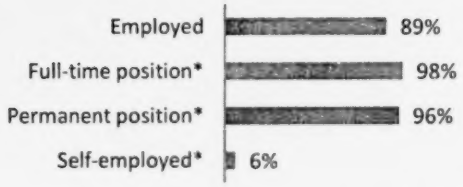
Nearly all employed former apprentices were working full-time[4] (98% of those employed) in a permanent position (96%). Only 6% of employed respondents were self-employed,

[3] Source: Statistics Canada, Labour Force Survey.

[4] Full-time employment is defined as working 30 hours or more per week.

although this percentage was substantially higher among students who were enrolled in Carpentry (17%) and Pipefitter & Sprinkler Fitter (15%) programs.

Former apprentices were employed in full-time, permanent positions



*Percentages are based on those employed

What occupations do former apprenticeship students have, and how much do they earn?

More than nine out of ten (91%) of employed respondents reported that their main job was in Trades, Transport, & Equipment Operators & Related Occupations. The second most common occupation category was Sales & Service Occupations, representing 5% of employed respondents.[5]

The median hourly wage for all respondents employed at the time of the survey (February/March, 2009) was $29, and has been increasing steadily since 2005—wage figures in previous years were $24 (2005), $25 (2006), $27 (2007), and $28 (2008).

Median hourly wages varied across occupations. Among the most commonly cited occupations in 2009, wages ranged from a low of $17 (Chefs & Cooks and Butchers & Bakers), to a high of $34 (Technical Occupations in Electronics & Electrical Engineering).

[5] The National Occupational Classification (NOC) system was used to assign codes to the occupations former students had at the time of the survey.

Hourly wage of most common occupations, 2009

Occupation*	Median Hourly Wage
Electrical Trades & Telecommunication Occupations	$30
Motor Vehicle Mechanics	$25
Machinery & Transportation Equipment Mechanics	$32
Plumbers, Pipefitters & Gas Fitters	$30
Contractors & Supervisors, Trades & Related	$30
Carpenters & Cabinetmakers	$26
Metal Forming, Shaping & Erecting Occupations	$29
Chefs & Cooks	$17
Masonry & Plastering Trades	$27
Machinists & Related Occupations	$29
Printing Press operators, Commercial Divers & Other Trades & Related Occupations, n.e.c.	$32
Other Construction Trades	$27
Butchers & Bakers	$17
Technical Occupations in Electronics & Electrical Engineering	$34
Other Mechanics	$20

*National Occupational Code - 3-digit level

Employed respondents who took further studies after completing their apprenticeship training had a slightly higher median hourly wage than those who did not ($30 vs. $29).

Despite the economic slowdown that began in British Columbia in the latter half of 2008, the median hourly wage rate among the overall B.C. population increased from $19 in March 2008 to $20 in March 2009 (unadjusted). Among former apprenticeship students, the results were similar. As shown in the following table, the median wage rate in some of the most common occupations of former apprenticeship students increased between 2008 and 2009, and where there were decreases, they were small.

Median hourly wage rates among the most common occupations remained relatively stable between 2008 and 2009

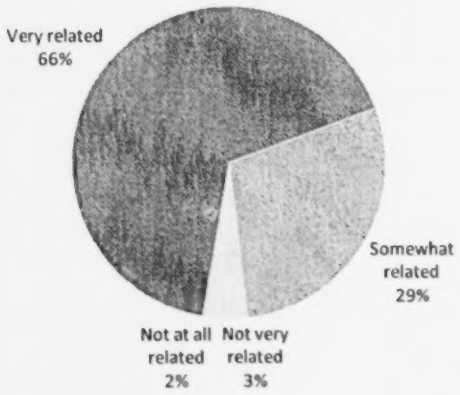
Occupation*	Median Hourly Wage 2008	2009
Electrical Trades & Telecommunication Occupations	$29	$30
Motor Vehicle Mechanics	$24	$25
Machinery & Transportation Equipment Mechanics	$31	$32
Plumbers, Pipefitters & Gas Fitters	$28	$30
Contractors & Supervisors, Trades & Related	$30	$30
Carpenters & Cabinetmakers	$25	$26
Metal Forming, Shaping & Erecting Occs.	$30	$29
Chefs & Cooks	$15	$17

*National Occupational Code – 3-digit level

How relevant is apprenticeship training to labour market demand?

Generally, former students were employed in jobs relevant to their apprenticeship program, as indicated by their high ratings of the relatedness of in-school training to their current work. Nearly all (95%) who were employed at the time of this survey rated their job as being *very related* or *somewhat related* to their training.

Most employed respondents were in a job related to their apprenticeship training



Often, apprenticeship work placements offer a position to students when they complete their program. In 2009, more than three-quarters (77%) of those employed said that they had completed at least one placement with their current employer.

About the survey

The Apprenticeship Student Outcomes (APPSO) Survey is an annual province-wide survey of former apprenticeship students who have completed their final year of apprenticeship training in a participating B.C. post-secondary institution. The APPSO survey is conducted with funding from the Ministry of Advanced Education and Labour Market Development (ALMD), the British Columbia Industry Training Authority (ITA), and participating British Columbia post-secondary institutions. The British Columbia Outcomes Working Group (OWG) oversees all aspects of the project.

This article is based on data from the 2009 APPSO survey, which contacted 2,099 former apprenticeship students from 27 institutions (14 public and 13 private). Former students were surveyed 9 to 20 months after they completed their programs, and were asked about their in-school training experience, their workplace training experience, and their subsequent employment outcomes and further education.

For more information on the Apprenticeship Student Outcomes Survey, please see http://outcomes.bcstats.gov.bc.ca/Default/Home.aspx

B.C. EARNINGS AND EMPLOYMENT TRENDS

This is a monthly report designed to assist analysts monitoring changes in inter-provincial and inter-industrial earnings and employment levels. The report provides figures on persons employed and actual dollars earned. Primary emphasis, however, is placed on the 'percentage change' data to help highlight recent trends and/or structural shifts. Questions or comments should be directed to Ian Darling at (250) 387-0684 or Ian.Darling@gov.bc.ca.

Definitions and Explanatory Notes

Average Hourly Wage Rate & Average Weekly Wage Rate

Beginning January 1997, information is collected on the usual wages or salary of employees at their main job. Respondents are asked to report their wage/salary before taxes and other deductions, and include tips, commissions and bonuses.

Average Weekly Hours Worked

Average actual number of hours worked per week, main job, is calculated by dividing total hours by the total number of employed persons. When a respondent holds more than one job or business, the job or business involving the greatest number of usual hours worked is considered to be the main job.

Real (after inflation) Average Weekly Wage Rate

Average weekly wage rates, as defined above, minus the rate of inflation as measured by the applicable Vancouver, Canada, or U.S. consumer price index.

Employment (derived from Labour Force Survey, Cat No. 71-001) (Actual)

All persons during the reference week who either a) did any work for pay or profit, or b) had a job but were absent because of illness, weather, vacation, labour disputes, or personal or family responsibility. United States trends are calculated from civilian employment seasonally adjusted data published by the U.S. Department of Commerce.

Employment by Industry

Employment by industry is based on the North American Industrial Classification System (NAICS).
